ABSTRACT

The Hugger is a Bar-B-Q grill cleaner for porcelain or wire grills. The incorporation of a series of grooves that wrap around the rods of Bar-B-Q grills are the uniqueness of the invention.

2003073

#### SPECIFICATION

**Disclosure:**

Constructed of wood or a heat resistant plastic this Bar-B-Q grill cleaner hugs the rods of Porcelain grills and cleans without scratching and even works on the smaller diameter wire grills. The grill cleaner will not pack up with grease and can be easily cleaned, unlike the conventional wire brush grill cleaner and the woven plastic porcelain grill cleaner that pack with grease and dirt becoming unsanitary.

The drawing submitted with this application shows a particular design which is not important to the patent, the important feature of the invention is the series of grooves that wrap around the grill rods. It is this idea of the grooves that patent protection is required no matter what design the cleaner may take.

2023273

CLAIMS

The embodiments of the invention in which an exclusive property or privilege is claimed are defined as follows:

- 1). A manually operable tool for cleaning wire and porcelain Bar-B-Q grills consisting of a series of three or more grooves with the distance between grooves being three quarters of an inch from center line to center line.
- 2). A tool as defined in claim 1, in which the diameter of the grooves (with the grooves being half of a circle) would be one quarter to five sixteenths of an inch.
